

**2008 Humboldt Redwood Company (HRC) Habitat Conservation Plan (HCP)
Bald Eagle Annual Report (HCP 6.4)**
HRC Forest Science Department
1 February 2009

The 2005 Minor Modification to the Bald Eagle Conservation Plan requires follow-up surveys to be conducted if adult bald eagles are incidentally observed by field personnel near Timber Harvesting Plans (THPs). Additionally, it requires three property-wide surveys of potential bald eagle habitat every five years beginning in 2009. In 2008, no adult bald eagles were observed within 0.5 miles of proposed THPs, thus no follow-up surveys were required.
